While there are no formal dissents to this paper at the USIB Representatives' level, Mr. Huizenga's briefing memorandum points out that the Air Force Representative made repeated attempts to inflate the military aspects of the Soviet space program, maintaining that the paper was not properly balanced in this respect. In a number of instances adjustments were made to correct this impression, and BNE now believes that the present text goes about as far as it can without overdoing the military side of the picture. BNE believes that there is a good chance that General Triantafellu will propose some further changes or additions along these same lines.
